Announcing VentureWrench Startup Workshop “How Investors Work”

*Presented at the Business Resource Center at DavisTech
Thursday, November 1, 2018 from 4:30 PM-6:00pm*

The VentureWrench team from Enclavix, LLC is pleased to announce that the Enclavix President and CEO and co-founder, Nicole Toomey Davis, will be presenting a new workshop, “How Investors Work” at the DavisTech Business Resource Center on Thursday, November 1, 2018 at 4:30 PM.

This is an invitation – only meeting for established and experienced entrepreneurs and is designed to share Ms. Davis’ experiences working with investors as both a serial entrepreneur and in her past role as part of the funding pipeline for advanced technology as Director of Utah’s Centers of Excellence Program.

Ms. Davis commented, “The entrepreneurship game is stacked against entrepreneurs. Our goal at VentureWrench and for this workshop is to help level the playing field by helping entrepreneurs understand how investors really work.”

Event Details

About Enclavix, LLC and VentureWrench Startup Coaching for Entrepreneurs

The startup coaches and creators of the VentureWrench Library, the team at Enclavix, LLC, are experienced entrepreneurs who have started multiple businesses, raised millions of dollars in investment from investors and SBIR awards, and sold their last company to a public firm. Enclavix is an Artificial Intelligence software company that creates tools to accelerate innovation and entrepreneurship by applying artificial intelligence, machine learning and related technologies to identifying and curating resources to coach and support startup entrepreneurs. Our CEO has also mentored and provided grant funding for dozens of emerging technology companies through her public service. The team is passionate about entrepreneurship and its potential for entrepreneurs and for the economy.

Enclavix designed VentureWrench to help entrepreneurs find the information they need – from the best in class resources – as quickly as possible. Enclavix appreciates the support of the National Science Foundation which provided funding for a portion of this work.
